PERFORMANCE HIGHLIGHTS

In European markets, the gradual improvement of economic activity this year has slightly enhanced the flows of goods and thereby the demand for logistics services. Intereuropa recorded an increased volume of consignments in various areas, in particular in the Slovenian part of the Group, however, the continued uncertainty and heightened risks in Ukraine resulted in the downward movement of the sales result. Being part of the competitive struggle that shapes the sales prices of logistical services, we responded by intensified sales activities and by process optimisation, primarily through on-going informatisation that supports a better and faster service to our customers. Accordingly, we proceeded with the development of integrated information solution to support our logistics processes and started with activities to expand the SAP IT solution also to our major subsidiaries, and with digitalization of outgoing invoices. As a follow-up to optimization objectives, we launched active cost management and refreshment knowledge forms to strengthen the quality of our service which is closely interconnected with the qualification and motivation of the staff. In the reporting half-year, the sales revenue of the Group came to € 66.3 million, which was 8 percent or € 5.5 million behind the plan. The highest underachievement was recorded by our Ukrainian subsidiary in the railway transport services, which lost nearly 80 percent or € 5.6 million of sales revenues. The Group closed the reporting term with an operating profit of € 2.0 million and a net profit of € 0.2 million. In the Parent Company Intereuropa d.d., the net profit came to € 0.8 million.

STRATEGIC OBJECTIVES

Vision

Being a top-ranked provider of integral logistics solutions.

Mission

The mission of the Group is to meet the needs for logistics services and provide an optimal functioning of supply chains to the complete satisfaction of our customers, while creating added value for shareholders, employees and other stake-holders in a socially responsible manner.

Values

Integrity. We respect the highest ethical principles, good business practices and customs. We operate in full compliance with the applicable legislation, guidelines, recommendations, and internal regulations of our Company.

Excellence. Our services aim to offer the best solutions to the needs of our customers and are based on our advanced logistics know-how.

Adaptability and flexibility. Our services are prompt and tailored to our customers' needs. We achieve the required flexibility by applying innovative approaches and lean organisation.

Responsibility. We are distinguished by a high level of responsibility towards the obligations we undertake, the deals we make, as well as the social and natural environments in which we live.

Teamwork and appreciation of employees. The quality of our services is the result of the work of individuals and expert teams. We value diverse types of knowledge, experiences and different views.

The implementation of our corporate vision relies on a strategy of four key dimensions: logistics-centred product development, customer management, geographical coverage and effective Group management.

The four dimensions of developmental strategy are underlying for the strategic baselines of the Group:

- consolidating and strengthening the position of the leading market provider of comprehensive logistics solutions in the countries of the former Yugoslavia,
- business process streamlining involving innovative IT solutions,
- building up the culture of an innovative organization, susceptible to change, around motivated workers and efficient team work,
- ensuring financial stability through divestment, de-leverage and effective management of working capital.

BUSINESS PLAN 2015

The business plan for 2015 is designed on the starting position of the Intereuropa Group at the end of 2014, trends in the branch of logistics, strategic guidelines and forecasts of economic trends for our key markets.

In 2015, the Group will focus on intensified marketing activities and acquisition of new customers, watching closely the process optimisation and informatisation of operations.

Key goal:

- Exceed the income of the year 2014, without affecting the profitability, based on a changed market approach and acquisition of new business.

Other goals:

- retain and motivate our most promising staff, introduce a stimulating remuneration system based on achievement of the goals;
- active cost management in the segments of services by obtaining more favourable terms of purchase, by optimal use and cost efficiency of support functions;
- efficient management of working capital;
- on-going development of integrated IT solution to support the logistics processes of our core business, utilisation of the SAP solution in our major subsidiaries, and digitalisation of invoices;
- uniform capture of operational data by unification of IT solutions;
- investing in projects with a short-term return and supporting the needs of our customers that are indispensable for retaining the asset value, or imposed by law;
- disposal of non-operating assets.

Core financial goals:

- Sales revenue: € 144.1 million;
- EBITDA: € 13.0 million;

ECONOMIC TRENDS

According to the International Monetary Fund forecast for 2015 published in July, the world economic output is expected to grow by 3.3 percent on average, thereof advanced economies by 2.1 percent, and other economies by 4.2 percent.

The strengthened economic activity in the Euro Zone has continued from the first quarter throughout the second quarter of this year. Economic growth was mainly driven by investments. The growth in major trade partners of Slovenia was attributable to domestic demand (Germany, France), whereas in Italy, the growth recorded in the first quarter after a rather long time was primarily driven by investments. Also the indicators of economic sentiment further improved in the second quarter and point to continuation of recovery. The price of oil, which fell considerably in a year's time, added to more favourable economic circumstances.

Slovenia saw increased short-term indicators of economic activity arising from domestic demand at the start of the second quarter of the year, whilst the exports fell slightly. The growth recorded in the first quarter has discontinued: in April, the exports decreased in real terms, but were still higher than in the same term last year. The income in trade improved: individual segments of retail trade showed continued growth, though modest, in retail consumption. The sentiment of consumers and of the economic sector achieved the highest levels since the outburst of recession.

After six years of shrinking, Croatia finally recorded positive trends in the initial months of this year. A slight GDP growth is expected primarily from growing exports. After a year of recession, Serbia recorded a slight recovery, too, whereas Bosnia and Herzegovina has seen no positive trends yet. Montenegro presents more optimistic growth rates in the hope that recovery in European and other foreign markets would have favourable impact on other Western Balkan economies.

The conflict situation in Ukraine has reflected on the national economy, which recorded a 17-percent fall in the first quarter of this year below the same term last year. In the reporting half-year, the Ukrainian currency lost nearly 20 percent against the euro.

SALES REVENUE

This year's economic revival has gradually improved the situation in the logistic market. In Intereuropa, the strengthened demand for logistics and transport services was mainly felt in the parent company, as the majority of subsidiaries in the Group were operating in countries with weaker economic activity. In Slovenia, we recorded a higher physical volume of processed orders in many services from the Land and Intercontinental Transport areas, but the income grew at slightly lower rates due to strong competition and the resulting pressure on rates. The Parent Company, representing nearly 70 percent in the sales structure of the Group, achieved a 3-percent growth of the sales revenue in the reporting half-year thanks to intensified sales activities. In the scope of informatisation of operations in the Group, we continued introducing our IT support to warehouse operations and road transportation in Croatia, and started preparing for expansion of the SAP solution to major subsidiaries. Along with keeping the logistics know-how up-to-date and active cost-of-services management, informatisation was in the centre of our activities involved in process optimization in the reporting term, too.

In the first half-year 2015, the Intereuropa Group recorded **€ 66.3 million of sales revenues** from services, which was 6 percent less than a year ago. Improvement was achieved primarily in the sale of sea-freight services (€ 1.8 million up), ca. 15-percent growth on average. The loss of sales revenue from rail-freight services by € 5.6 million (or nearly 70 percent) essentially affected the sales result of the Group; the situation in Ukraine, where our subsidiary has been operating in unstable economic and political situation, contributed a great deal to that loss. Internal tough situation in the country and conflicts with Russia reflect on shrinking sales results of our subsidiary, especially in the rail-freight segment. Services that resulted in a growth were domestic transport services (by 13 percent) in the range of our Land Transport area, and shipping agency (by 20 percent), air-freight services (by 7 percent) and sea-freight segment in the Intercontinental Transport area.

Table 2: Sales revenue of the Intereuropa Group by business area, in 1000 €

Business area	Jan - Jun 2015	Structure	Index 2015/plan	Index 2015/2014
1 Land transport	36,790	55%	87	89
2 Logistics solutions	8,124	12%	91	95
3 Intercontinental transport	18,177	27%	103	105
4 Other services	3,239	5%	104	98
TOTAL SALES REVENUE	66,330	100%	92	94

The target sales revenue for the reporting term was not achieved. The major part of setback was recorded in the sale of rail-freight services in our Ukrainian subsidiary, and a part in the car logistics services: only two thirds of the planned sales revenue were achieved.

Considering the improved sales result in the Parent Company, the share in the sales structure of the Group members based in Slovenia in the reporting half-year rose from 63 to 68 percent. Sales growth was also achieved in other subsidiaries, except in Croatia, Ukraine and Macedonia.

1	EU countries	55,347	83%	100	101
2	Non-EU countries	10,983	17%	66	69

The structure of Intereuropa customers by size, branch of industry and geographical presence is quite dispersed. In the reporting term, we recorded a slightly higher share in customers based in the European Union (78 percent) on account of improved sales to Slovenian and German customers, compared to the share of customers based in the countries of former Yugoslavia (excluding Slovenia and Croatia) that remained at 12 percent.

Land transport

We achieved a sales revenue of € 36.8 million from the Land Transport Area in the reporting half-year, or 55 percent in the sales structure of the Intereuropa Group. The highest share was generated by the Parent Company that contributed over 60 percent to total sales revenues from the services of Land Transport, and 20 percent by the Zagreb subsidiary.

Compared with the term January-June 2014, the sales revenue was 11 percent lower. That decrease was mainly attributable to the loss of operating revenues from Ukraine, due to adverse situation impeding normal operations. The operating revenues of our Ukrainian subsidiary fell by € 5.6 million below the result of the comparable half-year 2014, which is difficult to compensate in full merely by increasing the sales in other products. Also our subsidiary in Croatia recorded adverse results in all products except in domestic transport. The subsidiary in Macedonia remained behind due to unfavourable results in road transport. Growth of turnover compared with last year was recorded in Slovenia, Bosnia and Herzegovina, Serbia, Montenegro, Kosovo and Albania.

Product-based results show a decline in our railfreight product only (attributable to the extraordinary situation in Ukraine). The operating revenue of Groupage Services remained on the level of the first half-year 2014. Other products recorded growth.

In terms of the plan, we were by 13 percent below the sales targets; most of that setback was recorded in our Ukrainian subsidiary in the rail-freight segment. The best performing company was Intereuropa d.d., which contributed the highest share of sales revenues in Land Transport. Decline was recorded also in the Croatian subsidiary (in all products except domestic transport) and in the Macedonian subsidiary (road transport), in addition to the Ukrainian subsidiary.

In Slovenia, we achieved an increased physical volume of processed orders compared to the first half-year 2014, which reflected in higher sales revenues from all the products of Land Transport, except from customs services: there we were 2 percent below the sales revenues of the first half-year 2014. There was a strong competition among the providers of logistics solutions in the market, which reduced our earnings per unit. While we struggle for every single consignment by our marketing activities, we are restricted in the choice of eligible customers in the market owing to ill payment practices: great caution is necessary in acquisition of new business, as well as in doing business with our present customers.

Road transport:

- Road transport has the biggest share in the sales revenue structure (27 percent) among the services offered by Intereuropa, and nearly one-half among the services in the scope of Land Transport.
- The Group was 3 percent behind the sales plan, but maintained the sales revenues on the same level as in the comparable half-year 2014.
- The best results were achieved in Slovenia, where the Parent Company improved the income by 4 percent, and in Montenegro.
- The worst fall of sales revenues in absolute terms was recorded by our subsidiaries in Croatia, Macedonia, and Ukraine.
- Pressures on prices continued and the resulting reduced sales margins has persisted for quite a long time. We are addressing that issue by active management of suppliers and direct costs.

- Intensive activities were conducted to launch our new integrated IT solution WexVS in Croatia, where the new application came to use in July.
- For the next term we plan to provide for information support to the processes linking our suppliers-carriers in Intereuropa d.d.

Groupage Services:

- Our sales revenue from this product in the reporting half-year remained on the level of the preceding year.
- More than three quarters of all revenues from groupage services in the Group were generated in Slovenia. The number of orders processed was 8 percent, and our sales revenues were 3 percent higher than the comparable last half-year.
- Growing sales revenues were recorded in the subsidiaries in Bosnia and Herzegovina, Serbia, Macedonia and Kosovo, as a result of growing quantities of carried goods. These subsidiaries also exceeded their targets.
- On the other hand, the subsidiaries in Croatia, Montenegro and Albania recorded a downturn in the sales and a setback behind the plan.
- In the annual meeting of representatives of our subsidiaries, we organized a training on legal, insurance and financial risks in international road transports focusing on groupage services.

Customs Services:

- The sales revenue in the reporting half-year was 3 percent higher than in the comparable term a year ago.
- In Slovenia, where one third of all sales revenues from these services are generated, our sales result was 2 percent lower than last year, but we achieved the target volume.
- The sales revenue was 15 percent lower in Croatia, and one percent lower in Serbia. Other subsidiaries recorded higher operating revenues than last year and surpassed the sales targets.
- Activities were conducted on the inclusion of Macedonia (1 July 2015) and Serbia (estimated for 1 October 2015) to the NCTS.
- In the course of complaint management and elimination of non-compliances in the work process, we endeavour to reduce the cost resulting from operational flaws. So we started preparing preventive and corrective measures, focusing on the education of employees.

Domestic Transport ¹:

- The sales revenue was 13 percent higher than in the first half-year 2014, and 11 percent above our plan. All our subsidiaries offering this product achieved growth.
- Our Croatian subsidiary generated the highest share in the sale of this product (59 percent). After last year's decline in the sales revenue, the achieved 17-percent rise in the sales compared with the same half-year 2014 reflected a positive trend. One quarter of the total revenue was achieved by the Parent Company in Slovenia; our subsidiaries in Bosnia and Herzegovina made 11 percent and in Serbia 4 percent.
- In Slovenia, we achieved a 3-percent growth of sales revenue and exceeded the sales targets by 15 percent.
- All companies in the Group conduct on-going activities on process optimisation, cost management and optimum implementing solutions that will retain the quality of service on the highest level.

¹ The product "Express transport" was renamed as "Domestic transport".

- We are developing a new mobile application to support drivers in delivery/ pick-up of consignments, and replacing the OBC² equipment with mobile devices.

Railway Transport:

- The volume of services in our Rail Transport fell considerably below the sales target (68 percent) and was 69 percent lower than in the comparable half-year 2014.
- The performance of this product was greatly affected by the unstable political situation in Ukraine, where our subsidiary TEK ZTS of Uzhgorod is based, which reflects adversely on the economy, too. Despite decreased sales revenue, the Ukrainian subsidiary contributed 52 percent of total sales revenue in rail transport services.
- The Parent Company (Slovenia) exceeded both the results of comparable half-year 2014 and the sales targets.

The performance of our Land Transport was highly vulnerable due to unstable political situation in Ukraine, given that our subsidiary based in Ukraine contributed in previous years as much as 20 percent of total sales of our Land Transport Area, mainly by railway transport. Our subsidiary in Croatia is facing fierce competition, which has been in the reporting term worst felt in the road transport services. It will be hardly possible for us to make good for the loss of income in these two subsidiaries, chiefly in the Ukrainian one, by the year-end.

The demand for transport and logistics has strengthened in the market, which has brought about a rising volume of orders and physical volume of operations. However, the pressure of customers to reduce their costs and the resulting fierce competitive struggle among logistics providers have impeded the financial result from that favourable trend. In their wish to acquire business, competitors offer dumping prices. Our customers seek ways to reduce the cost of their logistics and increasingly use tenders with all the shorter term of validity for the business thereunder. On the other hand, the tender requirements are rising and demand an increasing workload for the same or even lower financial gain. Informatisation of operations is prerequisite for us to be able to cope with tenders: it can take the administrative work away from us and satisfy the need for consignment traceability, as well as meet increasing requirements for numerous indicators of the quality of service that our customers expect from us. At present, the new IT solution is being introduced to our Croatian subsidiary that will allow for better supervision over the provision of services; combined with enhanced traceability of consignments, it further improves the quality of our service. In July, the new IT solution came to use in road transport in Croatia.

We will continue with our on-going activities towards higher cost efficiency and operation streamlining, as well as the activities aiming to increase the sales revenue, in the next half-year. Furthermore, we will keep on maintaining a high quality level of our service, which is a prerequisite for success in the market.

Logistics solutions

In the reporting half-year, we earned a sales revenue of € 8.1 million in this business area, which stands for 12 percent in the sales revenue structure of the Group. The sales revenue was 5 percent lower than in the comparable term a year ago, and 9 percent behind the plan. The volume of operations and inventories of goods kept by our customers remained on relatively low levels. We still had to cope with pressures on the prices of logistics services and changed logistics concepts.

² On-Board Computer

In Slovenia, which is our key market representing 65 percent of the sale of logistics solutions, we achieved the last year's results but remained 4 percent behind the plan. Underachievement was also recorded in other subsidiaries of the Group with storage facilities: the highest underachievement of the target was recorded by our subsidiary in Croatia (19 percent).

Croatian market is second in size in the Logistics Solutions Area: after Croatia's accession to the EU, there were some changes in logistics concepts and accordingly, our numerous activities thereunder focused on filling up their storage capacities and acquiring new business with a higher added value.

In addition of commercial activities, we continued with implementation of integral IT support to warehouse operations in Croatia and Slovenia.

Warehousing and distribution services:

- The sales revenue from storage services in the reporting half-year was € 7.4 million, representing 11 percent in the sales structure of the Group. We recorded a 1-percent rise over the achievement of the comparable half-year 2014, but a 4-percent setback behind the plan. In Slovenia, despite the 4-percent growth in the sales revenue, we were one percent behind the plan. The worst underachievement (-19 percent) of the plan was recorded in Montenegro.
- Having relocated the materials on store for tire re-treading from Logatec to Vrtojba, we improved the utilization rate of our storage capacities.
- We finished with refurbishment of warehouse in Logatec for the needs of a new customer dealing in pharmaceuticals.
- Our warehouse in Vrtojba was equipped with new racks for the needs of a new customer.
- Work started on restoring a part of roof of warehouse in Maribor.
- In Croatia, we acquired a new customer and filled the storage capacities in Varaždin.
- A new warehouse with capacity of 1,000 qm (m²) was completed in Sarajevo for a customer dealing in fruit and vegetables.
- The sales revenue from Distribution services in the reporting term was € 0.7 million, representing ca. one percent in the sales structure of the Intereuropa Group.

Plans for 2015:

- winning new logistics projects to fill the unoccupied storage capacities in Slovenia and in particular in Croatia;
- developing customer relations and enhanced cooperation with current customers;
- completion of installation of IT support to logistics solutions in Slovenia, continuation in Croatia;
- improving energy efficiency (replacing the worn-out gas-driven forklift trucks with electric ones);
- continued specialisation and optimisation of logistic processes by commodity category.

Intercontinental transport

The sales revenues from the sale of services in Intercontinental Transport amounted to € 18.2 million, which was 5 percent higher than in the first half-year 2014. In the structure of the overall sales revenue of the Group, the share of income from services of the

Intercontinental Transport area rose from 25 percent (in 2014) to 27 percent. The sales targets were surpassed by 3 percentage points in the reporting half-year.

We improved the sales results in all products except in car logistics; in the latter, despite a growing physical volume of vehicles handled, the earnings do not follow the growth rate owing to a different structure of services. The growth of sales result was highest in container transport, conventional sea-freight and in shipping agency. This year, the shipping agency product was established in Croatia, too.

The second quarter of the year saw considerable fluctuation in sea-freight rates, which aggravated the operations and long-term business. The weak demand for sea-freight services is reflected in extremely low levels of the Baltic Dry Index (BDI) in the first quarter, hitting the bottom of the last 30 years in February. The BDI recovered slightly in the second quarter of this year and gave us hope for a better second half-year; however, ship operators do not forecast any increase in demand on the principal import and export trading lines, at present.

Sea-Freight:

- The sea-freight and shipping agency segments combined represented 21 percent of the Group's sales revenue in the reporting half-year (17 percent last year). The revenue achieved was € 14.2 million. Thereof, well over 90 percent was achieved in the Slovenian market.
- We surpassed the targets by 14 percent and recorded a growth of 15 percent above the figure a year ago. Growth in the sales revenue was recorded in all our major markets.
- In conventional cargo shipments, we exceeded the plan by 17 percent. A newly acquired customer improved our operations in fresh fruit and vegetables. We recorded an increased number of despatches of phosphates, alumina etc. by our key customers.
- Significantly better revenues than in 2014 were achieved in other container transport products (full and consolidated containers), higher by 15 percent. The sales targets were surpassed by 8 percent. Growth was achieved in Slovenia and in the markets of Serbia, Montenegro, Macedonia and Albania, notable in export business via Adriatic ports.
- In the RO-RO product, we achieved a 5-percent growth of sales revenue. Synergies in uniting the Departments of RO-RO and car logistics were beneficial for some newly acquired businesses that demand a combined approach and competences.
- In the shipping agency product, we achieved a 20-percent growth of sales revenue in the Group. Such a significant growth is attributed to our service in the representation of a container ship operator in the ports of Koper and Rijeka. The achievement in the reporting half-year is all the more favourable as we no longer represent a major ship operator carrying vehicles in the year 2014. We carry out activities addressing the representation of a RO-RO ship operator in a new direct service for the Far East.
- Forecasts for the second half-year are highly uncertain, primarily arising from the forecasts by ship operators of container and general cargo who complain about insufficient occupancy of ships' space and expose a substantial drop in the demand for overseas transport, mainly from Asia. Such a situation is expected to last throughout the autumn.

Car logistics:

- We have perceived an increased volume of vehicles handled in this segment. The physical volume of vehicles handled rose by 13 percent in this half-year.
- Due to a different structure of services, the revenues do not reflect such a high increase in the physical volume handled. We achieved € 2.2 million of sales revenue and remained 35 percent behind the sales targets. A substantial fall was felt in the volume of car shipments by land.

- In a tender, we succeeded in retaining a major customer in car logistics, who gradually reduces the quantities of vehicle transport via Koper port.
- We take part in negotiations for a new major export business of handling vehicles bound for the Far East via Koper, which could have a bearing on the development of car logistics in the Parent Company by the end of this year.

Air-Freight:

- In this segment, we achieved € 1.7 million of sales revenues and an increase of revenues by 7 percent over the figure a year ago. We surpassed the targets by 2 percentage points.
- Significant growth was achieved in the markets of Slovenia, Croatia and Kosovo.
- In Kosovo, we provide logistics for the German army, while in Croatia we have recorded a bigger volume of one-off businesses. In Serbia, we agreed about representation of export charter businesses via airports of Belgrade and Niš, but the implementation phase has been deferred to the third quarter of this year, so we are slightly behind the plan and expect a growth of sales revenue in the second half-year.
- Negotiations are conducted with several air carriers on agency representation in specific markets (Bosnia and Herzegovina, Albania, Serbia...), which would bring us a more efficient market position in the Balkans.

Operating Profit or Loss, and EBITDA

→ The underachievement of the operating profit planned for the reporting half-year was largely attributable to other unforeseen operating expenses – formation of provisions for lawsuits in the Parent Company in the amount of € 0.5 million.

Financing Profit or Loss

→ The negative Financing Profit/ Loss achieved was attributable to net interest expenses and to foreign exchange losses at € 0.3 million that were not envisioned (mostly arising from the Ukrainian currency value decrease). The latter are underlying for the underachievement of the planned financing profit or loss.

Net profit / loss

→ The profit/loss from ordinary activities was reduced by the accrued and deferred corporate income tax. The resulting Net Profit was € 0.2 million.

Structure of Statement of Financial Position

→ The current ratio came to 1.57 and remained essentially unchanged; the same applies to the share of capital in the balance sheet total.

1.3. Investments in fixed assets

In the first half-year 2015, the **investments in fixed assets** realized by the Intereuropa Group totalled **€ 1,235 thousand**, thereof 581 thousand in real estate and 654 thousand in plant /equipment and intangible assets. The annual plan of investments was completed to the level of 25 percent.

Table 7: Overview of investment in the period January – June 2015, in 1000 €

TOTAL	581	2,125	654	2,869	1,235	4,994	25

The investments of the Parent Company Intereuropa d.d. were made in real estate, equipment and intangible assets (€ 857 thousand); other members of the Group invested € 377 thousand in fixed assets. The biggest investment in this half-year was the reconstruction of warehouse in Logatec for the needs of our key customer, amounting to € 596 thousand to date.

The invested funds were earmarked to:

- Buildings and fittings/ equipment (€ 952 thousand),
- Computer hardware and software (€ 176 thousand),
- Repairs and purchase of motor vehicles (€ 106 thousand).

1.4. Risk Management

The central goal in risk management is to effectively address and reduce uncertainty in the Company and thereby assure higher operating performance and retain the competitive advantages of the Company.

At present, there are 46 types of risk identified in the company Intereuropa d.d., thereof 6 key risks. This year, our highest exposure was again to the sales risk of downward pricing pressure and to credit risk. We perceive that our exposure to risks is decreasing due to the activities undertaken by our Company, as well as resulting from slightly improving economic trends in our country. Our activities remain focused on marketing, collection of receivables and modernization of business processes, relying on information support.

Our greatest attention is dedicated to manage the sales risk. Downward pressure on prices and a decreased demand represent slightly lower risks than last year. We continue adapting to the needs of our customers, mainly by offering additional services and meeting the expected price levels. Most of our sales activities are focused on acquiring new customers and thereby increasing the productivity in our employees and the utilisation rate of our logistics facilities. Thanks to efficient execution of all marketing activities, we managed to close the first half-year above the targets and in line with our expectations for the sales.

In response to increasing price sensitivity in our customers, our internal process streamlining and cost management are very important, in particular in the area of warehousing where the fixed costs are the highest. In the Company, we consistently implemented our sales strategy and focused on new customer acquisition, along with day-to-day monitoring of our current customers.

The exposure to credit risk has remained on the level of acceptable risk. Our activities are directed to collection of receivables, which is very difficult to achieve in the face of concurrent pressure to expand, or at least maintain the sales volume. Observance of the limits for our exposure to certain customers is of key importance. We manage and reduce the credit and liquidity risks by daily control of working capital and exposure to individual customers. The Managing Board controls its financial condition and exposure to certain customers on a regular basis.

We estimate that Intereuropa d.d. has reduced the exposure to sales risks in the first half-year and maintained the level of exposure to financial risks. With the measures adopted and the activities in implementation, we envision to maintain the exposure of the Company to risks on an acceptable level, and to achieve the planned results in the future, too.

1.5. Human Resources Management

EMPLOYMENT TRENDS

The total number of employees in the Group was 1,418 as at 30 June 2015, which was 7 less. At the beginning of the year, 45 employees terminated their employment and 38 employees were newly recruited, mainly to substitute those who left, and due to increased volume of work.

Tabela 8: No. of employees in the Intereuropa Group according to countries, as of 30.6.2015

	30.6.2015	31.12.2014	Difference 15-14	Index 2015/2014

Albania	2	2	0	100
Ukraine	43	46	-3	93
TOTAL	1,418	1,425	-7	100

With other flexible forms of hiring the workforce, there were additional 7 percent of the workforce engaged in the Group, i.e. 96 workers as at 30.06.2015.

DEVELOPMENT, EDUCATION AND TRAINING

In accordance with the strategic guidelines of the Group, there were 8,415 hours of training (or 6 hours per employee) dedicated to the scheme of acquiring key branch-specific competences in logistics in the reporting half-year.

In terms of money, there were € 39 thousand spent on acquiring new skills, thereof € 20 thousand in the Slovenian part of the Group.

Internal lecturers were engaged in almost one-half of training forms (47 percent) in the Group, as follows:

- training forms on the WexVS IT solution and automatisation in the logistics process in the Parent Company and in the subsidiary in Zagreb;
- training for users of electronic interchange of outgoing invoices – EBA in the Parent Company
- workshops on IT support (SAP) in accounting and finance, in the Intereuropa subsidiaries in BiH, Serbia and Montenegro;
- Product Managers from the Parent Company transferred their knowledge on sales to 24 sales persons and executives from our subsidiaries in a workshop held in Croatia;
- a two-day training on risk management was held for 17 executives in charge of the organization of international transport from our subsidiaries, giving an opportunity for exchange of good practices and experience;
- Internal training on occupational health and safety still had the highest share in all training forms.

Among notable training forms involving external lecturers, there was a two-day workshop for the sales staff - 25 employees from the Parent Company, and training to accomplish the skills in business communication, understanding mutual relations, and motivation.

According to the substance, the training forms on occupational safety and health (52 percent), on sales skills (14 percent), and on IT solution supporting the logistics process (14 percent) held the biggest share in the training scheme of the Group.

HEALTH PROTECTION

Project Promoting Occupational Health in the Workplace

The activities implemented within the "Health Promotion Plan" in the reporting half-year were dedicated to our concern for health and well-being in the workplace:

- Introduction of 10-minute active breaks for exercise, led by individual co-workers in smaller groups in departments;
- Recreational facilities (fitness, gym and swimming pools), funded by the Company, were used by employees of our bigger business units;
- we organised a hiking tour;
- Physical exercises were held in our premises (in Koper, Ljubljana, Celje) in the scope of a project of the Institute of Occupational Safety (ZVD), the participating groups were tested for their motoric and muscular capacities to find the effect of exercising on the improvement of motoric system. The ZVD Institute published the findings of testing in informative folders and disseminated them to employees.

For the second half-year, we have scheduled another set of recreational scheme for employees in accordance with financial plans: another hiking tour, continued raising awareness in our employees on the importance of exercising for the motoric system, and workshops on stress control programmes.

Activities on Health and Fire Safety

In the field of health protection and fire safety and precautions, the following activities were implemented:

- We referred 146 employees to preventive preliminary, periodical, and target medical check-ups (thereof 60 employees in the Parent Company).
- With a variety of preventive measures in health protection of our employees, the sickness absenteeism is maintained within a manageable scope.
- Particular attention was dedicated to providing sufficient control over fire safety and precautions.
- Regular inspections of facilities, work environment, active and passive fire-fighting equipment (fire extinguishers and hydrant network, fire detectors, domed smoke and heat vents/exhausts, automatic fire-proof doors, etc.) were conducted in the scope of fire safety and prevention.
- In individual organizational units in Slovenia, 1,434 sets of different working assets/equipment were examined and tested, or 1,469 sets in the whole Group.
- There were 6 injuries at work in the Group.

1.6. Total Quality Management

Three companies of the Intereuropa Group (out of twelve operating companies) hold a certification under the ISO 9001:2008 Standard. Seventy-four percent of all employees work in these certified companies (Intereuropa d.d., Intereuropa d.o.o., Zagreb, Intereuropa RTC d.d. Sarajevo). There was an External Renewal Audit of the Quality Management System of Intereuropa d.d. conducted in the reporting half-year.

Maintaining the ISO 9001:2008 Quality Management System

- Yearly reports on the quality management system (QMS) were prepared for the year 2014.
- The Parent Company issued the fourth edition of the Quality Management System Manual for the company Intereuropa d.d.
- User manual and work instructions for the IT solution Wex Vs are being updated.

Internal auditing of service quality

- In the reporting half-year, no internal process audit was conducted in Intereuropa d.d.

Quality control by QM indicators

The number of complaints in Intereuropa d.d. rose by nearly one fifth, however, the value under complaints more than doubled, primarily on account of complaints relating to the transport services provided by our sub-contractors. The compensation for complaints in the reporting term amounted to € 29 thousand.

External quality of service audit by the certification authority

- **Intereuropa d.d.** - the renewal audit was the eighteenth in sequence. The audit was conducted in the following organizational units: Managing Board, Management of Forwarding and Logistics, Department for Real Estate Management and Central Purchasing, BU Koper, Brnik, Celje and Jesenice with local office in Kranj, and BU Ljubljana with local office Logatec.

It was confirmed that operations were conducted in compliance with the requirements of the ISO 9001 standard. Auditors did not find any non-compliance, however, they issued 24 recommendations for improvement. Report on the measures implemented based on the recommendations was sent to the certification body in three months' time.

- **Intereuropa, logističke usluge d.o.o., Zagreb** – Audit is expected in September. It will be the first ordinary audit, or the fifth in sequence, since the company certifies its QM system on its own.
- **Intereuropa RTC d.d. Sarajevo** – Audit is scheduled for October. It will be the second ordinary, or the ninth audit in sequence.

Operating Profit or Loss, and EBITDA

→ The sales revenue exceeded the plan. The share of direct costs rose minimally due to slightly changed structure of sales revenue by product.

The underachievement of the operating profit planned for the reporting term was largely attributable to other unforeseen operating expenses - the provisions for lawsuits in the amount of € 0.5 million.

Financing Profit or Loss

→ The Financing profit or loss was negative: net interest expenses as the major impact on the negative side, and the revenues from shares in group members on the positive side.

Net profit / loss

→ The Net Operating Profit equalled the Profit or Loss from Ordinary Activities.

Structure of Statement of Financial Position

→ The current ratio came to 1.57 and remained unchanged; a slight rise was recorded in the share of capital in the balance sheet total, which amounts to 42 percent.

ACCOUNTING REPORT

The unaudited financial statements of the Parent Company and the consolidated financial statements for the Group are prepared in accordance with the law and the International Financial Reporting Standards (IFRS) as adopted by the EU.

The same accounting guidelines were applied in the consolidated financial statements as in those of the Parent Company, as indicated in the Accounting Report for the financial year 2014.

While preparing these statements, the management reviewed the assessments, estimations and presumptions and estimated them to be the same as those applied in the annual financial statements as at 31 December 2014, except in the estimated contingent liabilities of the Group. Actual results may differ from such estimates.

In the reporting term, the subsidiary Intereuropa Transport d.o.o. was in liquidation proceedings. Capital increase was implemented in the Ukrainian subsidiary TOV Intereuropa-Ukraina, Kiev.

Considering the figure published in the Annual Report 2014, the amount of comparable data on contingent liabilities for bank guarantees and warranties was corrected by € 5,166 thousand owing to inclusion of contingent liabilities of the Group, for which the management estimates that the possibility for outflow of resources embodying economic benefits is low.

Fair value of financial instruments

With regard to calculation of their fair value, they are classified in three levels:

- **Level 1** considers the unadjusted price listed in an active market on the date of measurement;
- **Level 2** considers the inputs other than the listed price of Level 1, and such inputs can be directly or indirectly monitored for assets or liabilities;
- **Level 3** considers unmonitored inputs for an asset or liability.

Fair value of financial instruments

With regard to calculation of their fair value, they are classified in three levels:

- **Level 1** considers the unadjusted price listed in an active market on the date of measurement;
- **Level 2** considers the inputs other than the listed price of Level 1, and such inputs can be directly or indirectly monitored for assets or liabilities;
- **Level 3** considers unmonitored inputs for an asset or liability.

Table 42: Levels of fair values in the company Intereuropa d.d. as at 30.6.2015 and 31.12.2014

in 1000 €	30.6.2015			
	Level 1	Level 2	Level 3	Total

	31.12.2014			
	Level 1	Level 2	Level 3	Total
Financial assets, available for sale	1,412	0	132	1,544

We estimate that the carrying amounts (book values) of other financial instruments reflect their fair values.

IN BRIEF ...

A revival of goods flows has slightly improved the indicators of this year's indicators of economic trends in Europe. The logistics market responded to the growth as it occurred, and to the gradually stronger demand. Intereuropa felt that trend primarily in the Parent Company, as the majority of subsidiaries in the Group were operating in countries with weaker economic activity. The situation in Ukraine remains entirely unpredictable: adverse impacts on the economy in the region have slashed the income of our Ukrainian subsidiary, too. In Slovenia, we recorded a higher volume of processed orders in many services from the Land and Intercontinental Transport areas, but the income grew at slightly lower rates due to tough competition and the resulting pressure on rates. The Parent Company, representing nearly 70 percent in the sales structure of the Group, recorded a 3-percent growth of the sales revenue in the reporting half-year thanks to intensified sales activities. In addition, the Group continued introducing our IT support to warehouse operations and road transportation in Croatia, and started preparing for expansion of the SAP solution to major subsidiaries. Along with keeping the logistics know-how up-to-date and active cost-of-services management, informatisation was in the centre of our activities involved in process optimization in the reporting term, too.

The consortium of banks - majority owners of the Intereuropa shares, whose aim is to sell the shares, was carrying on with their activities. In July we were informed that the banks received a binding offer from Tuffieh Fund. Acting in favour of all shareholders, the Managing Board of Intereuropa endeavours to minimise the adverse consequences of the sales procedure on the Company's operations.

In the first half-year 2015, the Intereuropa Group recorded **€ 66.3 million of sales revenues** from services, which was 6 percent or € 4.4 million less than a year ago. The setback is entirely attributable to the loss of income in our Ukrainian subsidiary, which lost € 5.6 million of revenues. That was the main reason for our underachievement of the sales target. Thanks to higher physical volume of orders from other markets, we were able to improve our sales in sea-freight segment, in which we recorded a 15-percent growth on average, and in domestic land transport (13 percent higher income).

The result of the Group was **€ 5.3 million of earnings before interest, taxes, depreciation and amortisation (EBITDA)**, with **€ 2.0 million of operating profit**.

The **Financing Profit or Loss at -1.8 million €** was slightly lower than planned on account of negative foreign exchange differences at € 0.3 million, which mostly resulted from the value decrease of the Ukrainian currency. Accordingly, the **Net profit /loss** for the reporting term came to **€ 0.2 million**.

The **Net Financial Debt** as at the last day of the term, amounting to **€ 84.7 million**, was 3 percent lower than at the year-end 2014.

We take pleasure in the revival of economic activity and hope that the rising trend will persist and reflect on some of our markets in which it was not felt to date. Dedicated activities in the area of sales, process informatisation and supplier management will continue in the second half-year. In this way, we aim to mitigate the consequences of unstable economic situation in Ukraine and achieve as many of our goals as possible.
